

**As your loved one was very special to you, we thought it appropriate to use this contribution for some very special animals at our shelters.**

Often, animals who have suffered at stockyards or factory farms suffer chronic disease problems or permanent disabilities. These animals require costly veterinary treatments, special housing, and intensive shelter care. This memorial contribution will provide for all of these special needs, and much more...animals who suffered the nightmare of "food animal" production will now live a life they once only dreamed of. We hope this brings you some comfort during this difficult time. You are always welcome to visit our shelters...a pig hug or a cow kiss can brighten even the saddest day.

With our deepest sympathy for your loss.  
May your pain ease with every passing day.
